Contact with and normal use of this product can result in the creation of airborne particles. Exposure to fibers and particulates made from silicic acid may cause mechanical irritation to the skin, eyes, nose and throat. Typically, such irritation occurs to newly exposed individuals, and usually diminishes after several days of exposure.

RESPIRATORY: A disposable mask designed for nuisance dusts is recommended where high dust levels may be encountered.

VENTILATION: Normal area ventilation is sufficient in most cases to keep dust and fiber levels to a minimum.

SKIN: Barrier creams, gloves, and long sleeve loose fitting clothing may be required for certain workers who have sensitive skin or contact dermatitis. Work clothing should be laundered separately from other clothing before reuse.

EYE: Not normally required, but as a good safety work practice. Suggest wearing of appropriate eye protection such as safety glasses/side shields or goggles whenever use of the product releases airborne fibers or particles.

OTHER: Observe good personal hygiene.
